

Franklin Discovery Academy

Supplemental Software Information Sheet

While at school, FDA Students utilize a variety of supplemental software programs. Many of these programs are used at school only. Some are available at home either through their own login or can be found in your student's Clever profile and can be used at leisure. Please DO NOT pay to upgrade any of these accounts as they are school owned accounts. If you wish for your child to experience upgraded features, you are encouraged to create your own personal accounts from home.

These programs are used in addition and as a supplement to Waterford (K-2) and Edgenuity (formally known as Compass) (3-6). These programs are either used as part of a specific engage class, to help students who are either struggling or need more to challenge them, or as an incentive for completing work and reaching goals. All programs are educational. Some are educational activities which are disguised as games. Mentor teachers can provide you with updates on your child's participation and progress in each of these programs at your request.

	Who?	What?	Clever Compatible?	Home Access	Parent Portals	More Information
Aleks	Grades 3+	Math				https://www.aleks.com/
CK-12		Science	Yes	Yes	No Parent Portal Available.	https://www.ck12.org/
